

NAUFAL ALTAF

SOFTWARE ENGINEER / DATA SCIENTIST

Tangerang Selatan, Banten | naufal@altaf.xyz | www.altaf.xyz | github.com/nawocci

FORMAL EDUCATION

Information System, Bachelor Program

Sep 2022 - May 2026

Mercu Buana University

- Graduated with a GPA of 3.66.
- Graduated in 3.5 years.

PROJECTS & EXPERIENCE

Heart Disease Prediction Model | IEEE Conference

Mar 2026

The 2025 International Conference on Orange Technologies (ICOT 2025)

- Published a research paper on predictive modeling for cardiovascular disease in ICOT 2025, published on IEEE (DOI: [10.1109/ICOT68409.2025.11425174](https://doi.org/10.1109/ICOT68409.2025.11425174)).
- Developed a state of the art stacking ensemble learning model for predicting heart disease achieving 94.0% accuracy on Kaggle Heart Failure dataset and 91.7% on UCI Cleveland dataset using a novel SEL-NNML framework

Mobile Development Cohort

Aug 2024 - Dec 2025

Bangkit Academy 2025

- Master materials such as Basic Kotlin, Fundamental Android and Intermediate Android and understand software design principles through SOLID Paradigm.
- Gain insight into Artificial Intelligence and Applied Machine Learning to create innovative and advanced Android applications.
- Completed a Capstone Project, gaining real-world experience in managing projects from planning to execution.

Gagasan Futuristik Tertulis (GFT)

Jun 2023 - Nov 2023

Program Kreativitas Mahasiswa (SIMBELMAWA)

- Collaborated with a multidisciplinary team to design a solution focused on safety and user experience in daily commuting and driving.
- Designed a concept for a heads-up display (HUD) integrated into glasses, enhancing driving experience through real-time navigation and contextual information.
- Applied research and design-thinking methods to translate futuristic concepts into practical, user-oriented system designs.

Software Development2022 - Present

Personal Projects

- Built and maintained application-level software with emphasis on functionality, data flow, and system integration
- Implemented client-side logic and REST-based communication to support CRUD operations and application workflows
- Debugged and refined application behavior to improve reliability and user experience

Android System & Kernel Development2019 - Present

Personal Projects

- Worked on Android kernel development and customization for specific devices, focusing on performance tuning and hardware compatibility
- Built and maintained device-specific AOSP components, including device and kernel trees
- Used Git-based workflows to manage patches, testing, and long-term maintenance of archived branches

SKILLS

Prog. Languages & Libraries		Tech. Skills
- HTML & CSS - JavaScript - TypeScript - Python - Java & Kotlin - C++	- NumPy - Scikit-Learn - TensorFlow - Keras - PyTorch - CUDA	- Linux Environment (CLI usage, remote server management) - Git & GitHub (branching, pull requests) - RESTful API development - Machine Learning development (data preprocessing, model training & evaluation) - AOSP & Linux kernel development (build system and device configuration)

CERTIFICATIONS

Certification in Intermediate Android	December 2024
Dicoding Academy	
Certification in Kotlin Programming	September 2024
Dicoding Academy	
Certification in Database Programming	July 2024
ORACLE Academy	
Certification in Database Design	June 2024
ORACLE Academy	
Certification in Java Programming	December 2023
ORACLE Academy	
Certification in Java Fundamentals	December 2023
ORACLE Academy	
Certification in CISCO CCNAv7	August 2023
Cisco Networking Academy	

ADDITIONAL INFORMATION

- Languages:** English (Fluent), Indonesian (Native), Japanese (Basic).
